2.5 Gallon Plastic Container Case Packer

Wrabacon custom designed this 2.5 plastic bottle case packer to case pack at a rate of 18 containers per minute. Containers measured 8.5" x 7" long x 18" high and weighed 18 lbs. Containers were received single file and were pushed 90 degrees into the pick area. Once two containers were located in the pick area a pick and place module picked the two containers placed them into an erected carton that was located on the bottom conveyor.
