Wrabacon, Inc. designs and manufactures a wide variety of quality and innovative custom product handling systems. These include Product Feeders, Pick and Place Systems, Product Merging, Product Dividers, Product Stackers and Destackers, Semi-Automatic Case Erectors, Product Accumulators, Container Denesting, Tray Stackers, and Conveyors. In addition, we offer complete system integration and custom equipment design tailored to meet specific needs.

Custom Closure Conveyor

Powered Roller Button Lock

The closure conveyor is designed to close clear plastic containers used primarily in the bakery industry.

At rates of 60 cpm, this conveyor transports open clamshells under a bar, which folds the lids up and over to the closed position. With lids held in place, the clamshells then pass through the powered roller button lock.

This 6' long stainless steel USDA approved system is adjustable to handle clamshells in a variety of sizes/heights and is also equipped with swivel locking casters.

Wrabacon manufactures these for the end user as well as for container manufactures.
